Workshop attendees

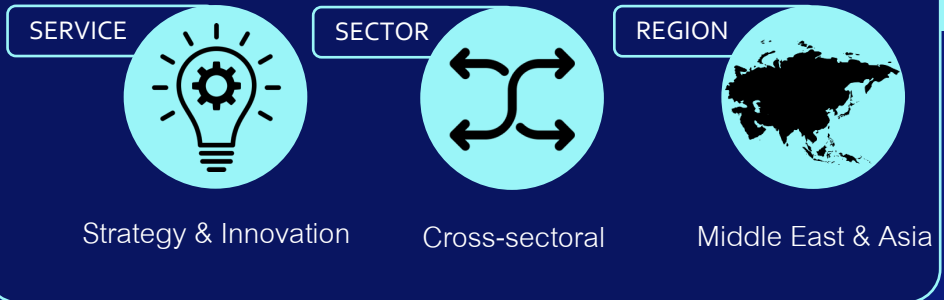

15

Priorities ranked and scored

3

Key policy recommendations

CHALLENGE

- Wanted to fill a gap in understanding about the challenges facing stakeholders in the energy, water, waste, buildings and transport sectors both to decarbonise and to manage the inevitable impacts of climate change
- Needed to conduct interviews and analysis of stakeholders in the sectors to develop a bottom-up perspective

ACTIONS

- Determined the scope of the engagement, including sectors and subsectors to be studied
- Worked with the client to develop a list of key stakeholders
- Interviewed stakeholders and distilled learnings for workshops
- Facilitated three remote workshops to prioritise insights
- Ranked and scored priorities across importance and complexity
- Compiled insights and analysis into a summary report with key actions and recommendations for DFF

RESULT

- DFF used the insights to recommend next steps for integrating Dubai's climate change response at a government level
- Stakeholders felt consulted in their perceptions about the challenges facing their sector in Dubai
